**Subject:** glyphosate: AA briefing slide deck revisions  
[Glyphosate updated AA brief slide deck 10.21.15.pptx](#)

Hi all,

Jack provided some comments at the OD briefing on glyphosate yesterday and **I have revised the slide deck to include additional prompts in red where revisions from HED, EFED, and BEAD may be needed.**

For the HED risk assessment slide, Jack had questions about AMPA and our tox dataset on AMPA. He also had comments on the volatilization assessment—perhaps we just say that glyphosate was not included in the volatilization screen because it is not volatile.

On the tier II incident and epi report slide, Jack suggested that we remove the last two bullets and mention that glyphosate was part of the Agricultural Health Study.

On the breast milk slide, Jack mentioned the Washington State University breast milk study and their results—perhaps we include that too.

I moved the breast milk slide ahead of the open lit review slide. I also added a slide on the EDSP tier 1 screening results—EFED and HED may need to work together to populate that slide. I made editorial revisions on a monarch slide and the “items to be published” slide.

Feel free to make additional revisions that I may have missed. Please make sure to complete revisions as soon as you can.

Thanks!

**Subject:** glyphosate: revised slide deck (and presentation structure)

**Importance:** High

Hi all,

Jess' presentation on the cancer reevaluation will be about 15 slides long and might take up to a half hour (with 10 mins for questions). In light of this, we are changing the order of the slides and restructuring the presentation:

EFED goes first,

Then PRD for monarch update,

Then HED,

Then over to Jess for the cancer presentation,

Then FEAD,

Then close.

Since Jess' presentation might take up a half hour, and our presentation is 15 slides and we need to leave 10 mins for questions, please consider streamlining your talking points as much as possible—aim for 1.5 minutes per slide.

Sorry for the short notice. See attached for revised slide deck.

Thanks,

Khue Nguyen
